

WHAT IS CLAIMED IS:

1. An auxiliary lens for a camera and the like, comprising:
a washer to be mounted to a camera and the like; and
an auxiliary-lens body to be joined to the washer to thereby be mounted to the camera and the like; wherein

the auxiliary-lens body has an adsorbing section made of a permanent magnet, a ferromagnetic substance or a magnetic substance at the position to be mounted to the camera and the like; and

the washer is made of a ferromagnetic substance, a magnetic substance or a permanent magnet that can be adsorbed to the adsorbing section of the auxiliary-lens body.

2. An auxiliary lens for a camera and the like according to Claim 1, wherein the washer is bonded by a user to the periphery of a lens of the camera and the like with a bonding agent.

3. An auxiliary lens for a camera and the like according to Claim 2, wherein the bonding agent is a double-faced tape, the double-faced tape being arranged on the washer in advance.

4. An auxiliary lens for a camera and the like according to Claim 1, wherein the washer includes several kinds of washers in correspondence to the size of the lens of the camera and the like.
